

REMARKS

Applicant has prepared formal drawings for filing in connection with the instant application, which are being filed herewith. Further, Applicant has amended the specification to refer correctly to formal drawing Figs. 11A, 11B and 11C. No new matter has been added to this application by entry of the foregoing amendment.

Attached hereto is a marked-up version of the changes made to the specification and claims by the current amendment. The attached page is captioned **“Version with markings to show changes made.”**

Applicant respectfully requests that a timely Notice of Allowance be issued.

Dated this 27 day of August, 2001.

Respectfully submitted,

John T. Kenney

USPTO Customer No. 20686

VERSION WITH MARKINGS TO SHOW CHANGES MADE

In the specification:

The paragraph on page 9, line 11 has been amended as follows:

Figures 11A, [and] 11B, and 11C are a flow chart of a process for generating and implementing donuts specifying user-profile information.

The paragraph on page 31, line 14 has been amended as follows:

Figures 11A, [and] 11B, and 11C are a flow chart of a process 220 for generating and implementing donuts specifying user-profile information. Process 220 may be implemented in software modules on a machine such as a web server in the exemplary network described above. In process 220, a user attempts to log onto the network (step 222). In response, the server determines if a donut exists in the database for this user (step 224). If a donut does not exist (step 226), the server queries the user, receives a response to the query, and generates a donut for the user based upon the response, using exemplary database structure 200 (step 232). An example of a query is provided below. Otherwise, if a donut does exist for the user (step 226), the server queries the user in order to update the donut (step 228) and implements the updates to the donut, using exemplary database structure 200 (step 230). The queries may involve the server transmitting a series of questions to the user and receiving from the user replies to the

Express Mail No. EL 809 718 100 US
Attorney Docket No. 4967.00

question. The queries may also involve survey questions as described above. The server may require a response in order for the user to receive content from the network.

Dated: August 27, 2001.
